

Da Vinci Leonardo 1482

Da Vinci Leonardo 1482 Chandelier

Description

The Da Vinci Collection is based on the challenging premise of using modern technology to create an original avant-garde suite of luminaire pieces that accurately portray the spirit of what Leonardo was doing in the late 15th and early 16th centuries.

The Leonardo 1482 Chandelier resembles a rising sun, borrowing heavily from Renaissance-era design, and is appropriately named for the year Leonardo Da Vinci began designing and developing his inventions.

Materials include the use of genuine brass that has been patinaed along with blackened aluminum.

Designed by Maurice Dery
