Luxennea S2 Pendant

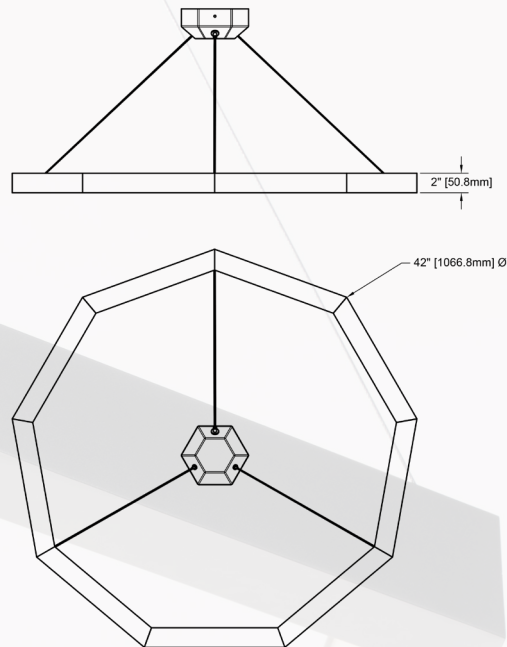

Description

The Luxennea Series 2 LED pendant is our new release of an already popular lighting design. Inspired by geometric shapes, our light is a nine sided "LUX" (light) "ENNEAGON". A sculptural creation that uses diffused light pointing inward to create beautiful ambient light.

The light is composed of nine (x9) faceted sides on the inner and outer diameters, a simple enneagon geometric shape is perfect for today's modern home. The light is illuminated with LEDs that gives the light high lumen efficiency, low power consumption, and long life.

Constructed with Karice's proprietary aluminum extrusion, the light can be made with the illumination pointing in, down, out or up.
