Shroom LED Pendant

Description

Shroom is a new innovative lighting design. Originally designed for the Alice in Wonderland themed bar display at IDS Vancouver 2016. The light is a piece of abstract art that has a loose artistic impression resembling a mushroom shape.

The LED pendant is composed of 30 vertical aluminum blades (gills) that are intricately held together by a cleverly designed, milled aluminum top and bottom cap. The light is illuminated from within its acrylic core as well as by downlight. Illumination is provided by 12V energy efficient LEDs. The light provides both mood and task lighting. A mesmerizing display of light is created by the cast of light as it reflects onto the aluminum blades. Each viewing angle produces a new result.

Designed by Maurice Dery
